3. What are the “main” differences between V2 and V3?

In version 2, forms were required to be filled and uploaded as pdf in the portal while in V3 the forms are to be filled online. This enables user convenience including the ability to save a half-filled form and file it later.

An additional facility/option is now available for annual filings to submit the forms through Offline Utility. In this option user will provide basic details in web form basis which they can download a prefilled excel and will provide rest of the data in excel itself. After filling in the excel, user will have to upload the excel in the web form.

Further in Version 2, there was only a “My Workspace” section which had a-list of notices and circulars issued by MCA. In Version 3, a new personalized feature called “My Application” has been added. This feature allows users to view all the forms filed by them so far along with the current status of each form such as pending for DSC upload, Under Processing, Pay fees, Resubmission etc.

When a user logs into V3, the login is through the email id whereas in V2 it was possible with the user id.

When a business user logs into the MCA system, a one-time password (OTP) will be sent to your mobile number and email address to ensure the authenticity of the user.

- **V2 Portal:** Forms had to be downloaded, filled in offline, and then uploaded to the portal.
- **V3 Portal:** Forms are now **web-based**, allowing users to fill them directly online. This enables features like **auto-save**, **pre-filled details**, and **real-time validation**, improving user experience.
- V3 introduces pre-filling based on linked records, reducing manual entry.
- Fields have been reorganized for better clarity and usability.
- V3 includes enhanced validation logic to reduce errors during submission.

A complete blank excel set (only previous year figures and information provided in the respective web form section shall be prefilled) will be downloaded in this case. Blank excels are required to be generated in this scenario as the entire functionality of linked forms web fields generation and excel generation is dependent on parent web forms fields.

23. What are the different Edit form scenarios in Offline mode?

Scenario 1 – If the user leaves the page after only clicking on 'Save' button on the parent form Accordion/Panel.

- Only parent form Accordion/Panel and 1st section before 'Save' button on this Accordion/Panel will be editable to user. User needs to click on 'Save' to enable the 2nd section on the page where 'Submit' button is displayed.

- After user clicks on "Submit" button, Accordion/Panels for applicable linked forms would become visible to the user.
- After successful submit the form filing process would continue as per normal process

Scenario 2 – If the user leaves the page after clicking on 'Submit' button on the parent form Accordion/Panel

- All the forms (Accordion/Panels) applicable to the user will be shown as per last submission of parent form,
- If user updates any details and clicks on "Submit" button in the parent form Accordion/Panel, then –
a complete blank excel set (only previous year figures and information provided in the respective web form section shall be prefilled) will be downloaded. Blank excels are

required to be generated in this scenario as the entire functionality of linked forms web fields generation and excel generation is dependent on parent web forms fields.

Scenario 3 – If user Edits Linked form

- All the Accordion/Panels applicable to the user will be shown as per last submission of parent form
- User then can open any of the applicable linked form Accordion/Panel and fill in the data and submit the linked form.
- Complete excel set will be downloaded with all excels prefilled with the last uploaded data, except for the form for which the web form data is modified. Blank excel shall be generated for the relevant linked form for which modification is carried out. (Exception to this will be in case of Extract of Auditors Report (Standalone) and Extract of Directors Report where blank 'Extract of Directors report' would get generated if any change is done in Extract of Auditor Report (Standalone).

The V3 MCA portal allows uploading up to 15 Excel files in MGT-7, each with a maximum size of 20 MB, totalling 300 MB. These files can be either macro-enabled predefined sheets or normal Excel sheets. While the portal accepts large Excel uploads, the generated PDF of MGT-7 does not embed or display the full content of these Excel files. Yes. All these fields are prefilled based on as on date information and are editable.

However, this can lead to discrepancies when filing for a past financial year, especially if changes occurred after the FY-end. Hence, system allow editing of prefilled class, category, and sub-category fields to reflect the correct status as on the closure of the financial year.

47. What is the logic of paid-event date for updating Paid-up Capital through Annual filing forms?

- Paid-up capital in MCA system gets updated only when event date mentioned in the current form is greater than or equal to the event date available in the system.
- Event dates for different forms:
 - PAS-3 – Date of allotment
 - SH-7 – Date of redemption [Redemption of preference shares]
 - SH-11 – Date of completion of buy back
 - INC-28 – Date of issue of certified copy of order [for reduction of share capital]
 - Annual filing forms [MGT-7/MGT-7A]: FY end date
- Ex: Company has filed PAS-3 on 10th May 2024 for allotment of shares with allotment date 01 May 2024. On 30 Sept 2024, Company filed MGT-7 with event date 31 March 2024. In this case, paid-up capital shall not get updated based on annual filing forms as existing event date available in the system is higher than the event date mentioned in the form.
- Ex. Company has filed PAS-3 on 10th May 2024 for allotment of shares with allotment date 01 May 2024 without giving effect of buy back which happened on 01 April 2024. on 01 Jun 2024, Company has filed SH-11 with event date 01 April 2024. In this case, paid-up capital shall not get updated based on SH-11 as existing event date available in the system is higher than the event date mentioned in the form.
- Ex. Company has filed PAS-3 on 10th May 2024 for allotment of shares with allotment date 01 May 2024 without giving effect of redemption of preference shares which happened on 30 April 2024. on 01 Jun 2024, Company has filed SH-7 for redemption of preference shares with event date 30 April 2024. In this case, paid-up capital shall not get updated based on SH-7 as existing event date available in the system is higher than the event date mentioned in the form.

Note: Stakeholders are requested to file the forms in sequential manner.

48. I have provided increased Authorised capital while filing MGT-7/MGT-7A. will this increased value get updated in the system?

No, the increased authorised capital entered in MGT-7/MGT-7A will not automatically update the master data in the MCA system. The MGT-7/MGT-7A forms are annual returns, and while they capture the capital structure for reporting purposes, they do not trigger Master data update for Authorised capital.

To update the authorised capital in MCA records, companies must file Form SH-7 (Notice of increase in share capital) or INC-28 (Notice of order of the court/competent authority) (if applicable).

49. I have created a new class in Form MGT-7/MGT-7A. Will my share class wise master get updated with the new class?

No. If your company does not have a share class-wise master in V3 then the system will not create a new class-wise master during MGT-7/MGT-7A filing. Only the company capital master will be updated with the new class details.

If your company already has a share class-wise master in the MCA V3 system, then the value of previously created class wise master, will get updated based on Form MGT-7/MGT-7A filing for both the share class-wise master and the company capital master subject to the paid event date condition.
